

# Run a faster 5 Mile

## WEEK 4 TRAINING PLAN

By 'Runuary' Coach Irene Clark  
 Requires a significant base level fitness – running 4 – 5 miles.  
**Mileage: 10-12 per week (3 days per week)**

### Training overview:

This is an outline for your weekly workouts. You don't have to do your runs on set days but try to avoid running twice in a row.

It is better to take a rest day or do cross-training on the days in between runs. Cross-training can include any other physical activity (walking or cycling).

15 to 20 minutes of strength-training one to two times a week can also be beneficial.

### A guide to the terms in this plan

- **Easy Run:** A gentle jog slightly above walking pace. Aids recovery and aerobic fitness.
- **Race Pace:** Comfortably hard. Approximately 80% effort.
- **Fast Run:** 90% effort. Used for shorter speed sessions
