

Run Your First 5 Mile

WEEK 4 TRAINING PLAN

By 'Runuary' Coach Irene Clark

This requires a base level fitness (completed 5k and now looking to progress to 5 mile).

Mileage: 10-12 miles per week (Across 3 days)

Training overview:

This is an outline for your training. You don't have to do your runs on set days but try to avoid running two days in a row.

It's better to take a rest day or do cross-training on the days in between runs. Cross-training can include any other physical activity (walking or cycling).

15 to 20 minutes of strength-training once or twice a week can also be beneficial.

A guide to the terms in this plan

- **Easy Run:** A gentle jog slightly above walking pace. Aids recovery and aerobic fitness.
- **Steady Run:** Comfortable but purposeful pace.
- **Race Pace:** Comfortably hard. Approximately 80% effort.
